The normal might fail to protect in abnormal circumstances. Rely only on the dependable choice.

**MeCef**

Ceftriaxone Sodium & Sulbactam 375/750/1500mg. Injection

The 3rd Generation Cephalosporin

MECEF is a better therapeutic option as it provides:

- Maximum coverage of gm+ve, gm-ve, anaerobes & aerobes
- Penetrates quickly, last for longer duration
- Excellent penetration in CSF, Bile, Gall bladder, Urine with long half life
- No dosage adjustment required in renal insufficiency as primarily excreted by biliary system
- Higher clinical success rates
- Faster recovery

**MeCef**

The empirical therapy of your choice

---

**The Synergistic combination for excellent results**

MeCef 250 500 1000

Ceftriaxone Sodium 250/500/1000 mg. Injection

**OFFERS THE MAXIMUM**

Surges ahead of Cefotaxime

WITH MINIMUM EFFORTS
For TIMELY action in hospitalized patients with serious infections TRUST

Tazocot
Ceftriaxone & Tazobactam Injections
Available in 1000+125, 500+62.5(HS) & 250+31.25(KID)

- Ensures effective treatment of serious community acquired and nosocomial infections
- Superior efficacy in reducing the frequency of local & remote post-surgical infections

Meningitis
Urinary Tract Infections
Gonorrhea
Bone & Joint Infections
Surgical Infections
Obstetric & Gynaec Infections

In
Respiratory Tract
Nasopharyngeal Infections
(Staphylococci & Pneumococci)
Skin & Soft Tissues
Dental Infections

CLICOT
Clindamycin Phosphate 150 mg/6 ml Injections

Clindamycin 150mg is approved for the treatment of Acne vulgaris by F.D.A. (U.S.A.)

Distinct advantages over Erythromycin
- Destroys Propionibacterium acne...
- Acne causing pathogens
- Decreases free fatty acids on the skin surface
- Significantly reduces inflammatory acne lesions and open comedons

An internationally proven treatment for "ACNE"
Destroy the destructive potency of life threatening infections

Merocot 1g
INJECTIONS Meropenem Trihydrate 1000mg.

- Lower RTI
- Septicaemia
- Intra Abdominal Infections
- Nosocomial Infections
- Meningitis
- Febrile Neutropenia
- Gynaecological Infections

Dosage:
- Adult: Pneumonias, UTI, Gynaecological Infections, Skin & Skin Structure Infections, 500mg, 8 hourly. Nosocomial Pneumonias, Peritonitis, hours, adult febrile Neutropenia, Septicemia: 1g every 8 hours. Meningitis: 2g every 8 hours.
- Children: Over 3 months and up to 12 years of age: 10-20mg/kg every 8 hours, meningitis: 40mg/kg every 8 hours, children over 50 kg: Adult dose

In your busy schedule

Maptaz - 2.25 4.5
Piperacillin Sodium 2gm + Tazobactam Sodium 250mg
Piperacillin Sodium 4gm + Tazobactam Sodium 500mg

- Nosocomial Pneumonia
- Community Acquired Pneumonia
- Pelvic Inflammatory Diseases
- Peritonitis

- Effective against important gram+, ve & anaerobic bacteria including betalactamase producing strains
- Exceeds MICs of most bacteria
- Achieves rapid & very high conc. into skin, lung & intestinal mucosa
- High clinical cure rates in a broad range of polymicrobial infections
- Well established tolerability & a dependable safety profile
**In Severe gm-ve bacterial infections**

**MeZid** Injection

Cefazidime 125 mg / 250 mg / 1000 mg.

The ultimate 3rd Generation Cephalosporin in:

- **Respiratory Tract Infections**
- **Urinary Tract Infections**
- **Skin & Soft Tissue Infections**
- **Bone & Joint Infections**
- **Surgical Infections**

- Wider range of Gm-ve coverage
- Stable against beta lactamases
- Synergistic actions with amino-glycosides

- In Pseudomonas aeruginosa infections
- No dosage adjustment required for patient with hepatic dysfunction

---

**Mezon-SB**

**Cefoperazone & Sulbactam Injection**

Endeavour Towards Definite Success...

- **Indications:**
  - Nosocomial Infections
  - Septicaemia
  - Meningitis
  - Endometritis
  - Orthopedic Infections
  - Surgical Infections

- **PROMISING COMBINATION:**
  - Demonstrates intrinsic activity against Acinetobacter and Neisseriaerae
  - Enhances sensitivity to hospital pathogens
  - Convenient twice a daily

**Mezon-SB**

Ensures Success Always...

**Packaging:**

- **MeZid 1000 mg**
- **MeZid 250 mg**
- **Mezon-SB 250 mg**
- **Mezon-SB 500 mg**
- **Mezon-SB 1000 mg**
- **Mezon-SB 1500 mg**
World Class
NEURON
Rejuvenator

Mecomin
Methylcobalamin 1500 mcg. Injections

How METHYLCOBALAMIN repairs damaged nerve fibers

- Repairs damaged nerve fibers by Stimulating Axonal regeneration
- Transported into organelles of nerve cells
- Promotes myelination through transmethylation process
- Promotes synthesis of nucleic acid and protein in nerve cells
- Promotes synthesis of lacithin, a major component of the myelin sheath
- Involved in folate metabolism which plays a key role in synthesis of purines and deoxyribonucleic acid (DNA)
- In neuropathy there is structural & functional changes of axon due to impairment of axoplasmic transport.
  Ancobal restores neuro-filament transport velocity.

Peripheral Neuropathy
Alcoholic Neuropathy
Diabetic Neuropathy
Drug Induced Neuropathy
Dementia

Cotdec
Nandrolone Decanoate 25 mg & 50 mg Injection

- Repair & build tissues
- Increases protein contents of bone & bone mass
- Enhances weight gain in under weight adults
- Employed in premature infants to increase the rate of weight gain
- Promotes Anabolism
- Debilitating diseases in old age
- Increase skeletal weight

Accelerate recovery in
- Major traumatic conditions
- Severe infectious diseases
- Refractory & Aplastic Anaemia
- Anaemia of chronic renal failure
- Prolonged Illness
- Emaciating diseases
- Fracture
- Surgery
- Burns

Cotdec
The anabolic power for maximum protein assimilation
In life threatening Gram-ve infections

**UNIK**

(Amikacin Sulphate 100/250/500 mg. Inj.I.P)

The choice among aminoglycosides is crystal clear

- Highest coverage among aminoglycosides of Gram-ve & Gram+ve bacteria
- First choice in pre & post operative coverage including septicaemia & neonatal sepsis
- Bacterial endocarditis
- High rate of cure in U.T.I. including severe pseudomonas infections
- Critical G.I. tract infections
- CNS infections including meningitis

"Amikacin has spectrum of activity like that of Gentamicin but Gram-ve bacteria resistance to Gentamicin, Tobramycin & Kanamycin are often, sensitive."

Martindale the extra pharmacopeia P152 30th edition.

**TRUCOT**

Tobramycin Sulphate 20/80 mg. Injections

- Best in Aminoglycosides
- A potent bactericidal action against microbes including B-lactamase producing, methicillin resistant & coagulase-negative strains.
- Effective against resistant strains of Gentamycin.
- Offers bactericidal activity close to MIC.
- Provides synergistic combination with penicillins/Cephalosporins

**UNIK**

The dependable fighter in life threatening & stubborn infections

A reliable name for threatening infections
The choicest potent ANALGESIC

**Tramacot**
Tramadol HCl 50mg. Injections

- Potent analgesic action within onset of action in just 15 minutes
- Longer duration of pain relief
- Activates descending inhibitory pain pathways by preventry 5HT & Nor-adrenative Re-uptake
- Unmatched safety profile

**Ideal therapeutic choice in:**
- Fracture & Dislocation
- Appendicitis
- Trigeminal Neuralgia
- Ureteral / Biliary Colic
- Cancer Pain
- Post Operative Pain
- Gynecological & Obstetric Pain

For
Rapid & Safe
Acceleration of labor

**Dortacot**
Drotaverine Hydrochloride 40mg. per 2ml.
INJECTIONS

- Highly effective in reducing the duration of active phase of labor
- Accelerates labor more rapidly than voletamate bromide
- Does not interfere with uterine contractility
- Reduces the incidence of cervical tears
- Safe for mother as well as fetus
  (free from anticholinergic maternal & fetal side effects)

Reduces injection-to-delivery interval

**Versatile Pain Reliever... More Effective & Safe**
When potency is as important as relief & healing during

- Upper G.I. Bleeding
- GERD
- Stress induced mucosal injury
- Burns, Head injury, M.I.
- Prevention of acid aspiration due to surgery

OPAN-40
Lyophilized Pantoprazole Sodium 40 mg. Injection

BENEFITS BEYOND EXPECTATIONS

UNLIKE OTHER P.P.I.S, OPAN-40 OFFERS

- Rapid action due to low first pass hepatic extraction
- Opan-40 displays an absolute oral bio-availability of 73% ensuring longer inhibition of gastric secretion
- Effective in preventing necrotic mucosal damage, hence more gastro protective.
- PH dependable activation prevents undesired effects.
- Maintains patients under continued remission.
- Maintenance free therapy in H. Pylori eradication.
- Safe on long term use.
- More acid stable.

Sure relief in nausea vomiting

UNO
Ondansetron 2mg/ml Injection & Ondansetron 2mg/5ml Drops

- It is a potent highly selective antagonist at the 5hydroxytryptamine receptors sub type 3 (5HT3)
- It can effectively control vomiting unlike metoclopramide, ondansetron is not a lopamide antagonist & does not cause dystoniam or extra pyramidal effects.
- It is a carazolo which causes antinauseant & antiemetic effects by selective & competitive blockade of the 5HT3 receptors.

Vomiting & Nausea associated with
cytotoxic radiotherapy & Chemotherapy, Prophylaxis & treatment of postoperative vomiting & nausea

UNO
Still the gold standard therapy
The 3rd Generation Cephalosporin

**Agcef is a better therapeutic option as it provides**

- Maximum coverage of gm+ve, gm-ve, anaerobes & aerobes
- Penetrates quickly, lasts for longer duration
- Excellent penetration in CSF, Bile, Gall Bladder, Urine with long half life
- No dosage adjustment required in renal insufficiency as primarily excreted by biliary system
- Higher clinical success rates, Faster recovery

**M-Try Wonderful Winner Forever**

**Preferential choice for**
- Genital rectal & pharyngeal gonorrhoea
- Pelvic inflammatory disease
- Sexually transmitted acute epididymitis
- Prophylaxis in surgical infections
- Septicaemia, Lyme disease
- Endometritis, Meningitis, Typhoid

**The power to combat troublesome infections**

**Masmox-CV 1.2g**
Amoxicillin 1000mg. & Clavulanate Potassium 200mg. Injections

**Extended Antibacterial Spectrum**
- Synergistic action of Amoxicillin and Cloxacillin
- Cloxacillin prevents enzymatic inactivation of Amoxicillin
- Target clinically important pathogens
- Prevents emergence of bacterial resistance
- Ensures per-operative prophylaxis and combat post-operative infections

**Established Efficacy in:**
- Respiratory Tract Infections
- Urinary Tract Infections
- Skin & Soft Tissue Infections
- Post-Operative Infections

**For dependable results in Polymicrobial Infections**
In severe P. falciparum MALARIA

COTMAL
1ml.
2ml.

α-β Arteether 75mg./Inj.

α-β Arteether
is indicated for use in severe P. falciparum Malaria including Cerebral Malaria

α-β Arteether
use as a second line treatment in Chloroquine resistant malaria

α-β Arteether
is well tolerated, tenderness, swelling or discomfort have never been reported.

While facing severe falciparum MALARIA

Falcicot
Artesunate 60mg. Inj

- Artemisinin derivatives are the potent & rapidly acting blood schizonticides
- Artesunate is well distributed and achieves high concentration in the intestines, liver and kidney
- A major role in severe malaria
- No risk of Hypoglycemia
- Easier to use
- Safe, Extremely Well tolerated

Right choice in P.falciparum malaria

Face it boldly with Falcicot

Malaria!
Quinine is the only life saving drug effective in Falciparum Malaria & Cerebral Malaria

**Mas-Q**

Quinine Sulphate 150 mg. **Syrup** / **Tablet** 300 mg.

**INDICATION:**
RESISTANT FALCIPARUM MALARIA, SYMPTOMATIC RELIEF OF MUSCLE CRAMPS, INCLUDING NOCTURNAL CRAMPS.

**Also Available**

**Mas-Q**

Quinine Dihydrochloride 2ml. **Inj.**

**figo-AL 20**

Artemether 20mg.
Lumefantrine 240mg. syrup

*plz. send the matter*

Artemether 20mg.
Lumefantrine 240mg. **Tablets**
Artemether 80mg.
Lumefantrine 480mg. **Tablets**
**FERO-C**

**TABLETS SYRUP**

Carbonyl Iron, Antioxidants, Multivitamin & Multimineral

**Vitamin B12** • Maturation of RBCs

**Folic Acid** • Crucial for Haemopoiesis

**B-Complex** • Biosynthesis of heme

**Zinc** • Vital for foetal growth

**Carbonyl Iron**
- Highest levels of elemental iron (>118 mg)
- Highest levels of bioavailability (70%)
- Higher rise of haemoglobin levels
- Highest levels of patient compliance

- General Weakness
- Pregnancy/Lactation
- Anaemia
- Chronic Blood Loss
- Epistaxis
- Menorrhagia

Each 10 ml contains:
- Ferric Ammonium Citrate (as Fero-C)
- 550 mg
- 20 mg elemental iron (114 mg)
- Folic Acid - 1 mg
- 5 mg pyridoxine hydrochloride
- 0.9 mg Cyanocobalamin (as B-Complex)

**MAS-LIV**

the complete herbal liver tonic

Reduce turnover of membrane phospholipids & thereby stabilizes cell membrane of hepatocytes

Acts as a potent antioxidant & also inhibits lipid peroxidation

Essential for synthesis & release of digestive enzymes Improves immunity

Overcomes various digestive disorders.

- Hepatitis /Jaundice
- Indigestion / Constipation
- Loss of appetite
- In chronic alcoholics
- Gastric disorder
- Liver Cirrhosis
- Along with hepatotoxic drugs for hepato protective action

**MAS-LIV**

Protects the Liver against various hepatotoxins, Promotes Appetite & growth.
For the complete health for all, one step ahead

Fumin-Z
Multivitamin, Multiminerals & Antioxidant Syrup/ Drop

• Strengthens immune status
• Helps in building bone & connective tissue
• Promote Physical & Mental Growth
• Improves Appetite

Meets the needs of all & brings back energy

Poor Health & Reduced Quantity of Blood... Leads to ANAEMIA
Nutritional Requirement Increases Many Fold During

Pregnancy  Lactation

Myfol
Ferric Ammonium Citrate 180 mg,
Cyanoacobalamin 7.5 mcg. & Folic Acid 500 mcg
Syrup

THE RIGHT HAEMATINIC
• Provides high conc. of elemental Iron
• Ensures faster rise of Haemoglobin

Folic Acid supplementation is recommended to prevent neural tube defects during pregnancy*  
*Therapeutic Drugs, 2nd Ed., 1990, Pg F-141

Myfol
The Right HAEMATINIC
Increased demand of Calcium the choice simple & clear

**MASCAL-P**
(Calcium 200 mg & Vitamin D, 200 I.U. Susp.)

**Indications:**
- Pregnancy & Lactation
- Growing children
- Osteomalacia
- Osteoporosis

**AN IDEAL**

**CALCIUM DURING PREGNANCY**

Meeting the need of Calcium for new mothers to experienced grand mothers

**MASCAL-M**
Calcium Carbonate + Magnesium + Zinc + Boron & Vitamin D3
TABLETS/SYRUP

**FORTIFIED WITH:**
- **Mg** Essential for optimum calcium metabolism
- **Zn** Essential for fetal development
- **Vit D3** Essential for calcium absorption

**THEREFORE IN:**
- Post Menopausal Women
- Nutritional & Malabsorption
- Osteoporosis
- Rickets
- Osteomalacia
- Hypoparathyroidism
- Pregnancy & Lactation
- Fracture & Trauma
- Elderly Persons
- Growing Children
- Renal Osteodystrophy

The best in calcium therapy
In Disorder of Liver

Apigro
Cyproheptadine 2 mg., Tricholine Citrate 275 mg./5ml. & Sorbitol base 3.375 (70%) Syrup

Protects Liver.... Promote Health....

TRICHOLINE CITRATE
Protect the liver

SORBITOL
Regulates the Gut Motility Relieves Constipation

Cyproheptadine HCL Helps stimulate appetite & enhance growth

- Rejuvenates liver cells in post hepatitis condition
- Reduces excess fat content of liver
- Increases appetite
- Eases constipation
- Co-prescription with anti T.B. Drugs
- Treatment & prophylaxis of drug induced liver damage

Amzyme Syrup
Fungal Diastase 50 mg. + Pepsin 10 mg.

Life is truly tempting...but when indigestion strikes

Diastase
Aids the digestion in the gastrointestinal tract
Improves defective acid secretion by the stomach
Regains the lost appetite rapidly

Pepsin
Possesses strong fibrinolytic and caseinolytic activity
Exhibits excellent digestion power
Corrects digestive disturbance

Enjoy every food court

Pizza Hut
KFC
Vimpys
Domino's
Monica's
Subway
Dry, unproductive cough can be irritating

Mucof
Chlorpheniramine 2mg., Dextromethorphan 10mg. & Phenylpropanolamine 12.5mg. Syrup

DEXTROMETHORPHAN
• Powerful antitussive
• Suppresses cough

PHENYLPROPA-NOLAMINE
• Proven decongestant
• Relieves respiratory congestion

CHLORPHENIRAMINE MALATE
• Time tested antihistaminic
• Controls allergy

For dry & unproductive cough associated with
U.R.T.I. ALLERGIES

The Right Choice

For desired relief in acidic conditions

GELCOT
Magaldrate 400 mg. Simethicone 60 mg. & Sorbitol Solution

Simethicone
• Reduces the surface tension of the frothy gastric contents, thus allows gas to escape
• Relieves associated indigestion, flatulence & reflux

Magaldrate
• Rapidly reacts with acid
• Provides prompt yet sustained antacid action

Sorbitol Solution
• An ideal anaesthetic agent
• Relieves associated pain

The time tested ANTACID GEL
In the medication & management of tuberculosis

Welcox
Rifampicin 120 mg., Isoniazide 80 mg. & Pyrazinamide 250 mg. Tablets

Rifampicin:
• Highly bacteriocidal to Mycobacterium tuberculosis.
• Quick absorption leads to high and well sustained blood levels.

Isoniazide:
• More effective against Mycobacterium tuberculosis than both streptomycin and PAS.
• Well absorbed from the alimentary tract and is distributed throughout the body.
• Always be given in cases where there is special risk of meningitis.

Pyrazinamide:
• It is the pyrazine analog of nicotinamide.
• Absorbed from the gastrointestinal tract and distributed throughout the body.

The first line treatment in TUBERCULOSIS

Oricin-Kid
Rifampicin 100 mg. & Isoniazide 50 mg. Tablets

• Acts by inhibiting RNA synthesis
• Particularly effective against mycobacteria that lie semidormant within cells
• Has a wide range of antibacterial activity.

The recommended & tested combination
Bactericidal Action
High penetration into infected tissues
Well absorbed & well tolerated

Welcox
Powerful Anti-Tubercular Drug with Excellent Performance & Unmatched Perfection

The First-Line, Till Tuberculosis Lasts

TOTAL TUBERCULOSIS ERADICATION
In paediatric diarrhoea & dysentery due to mixed infections

**AMFLOX-OZ**
Ofl oxacin 50mg. & Ornidazole 125mg. Suspension

The broad spectrum Antidiarrhoeal & Antidysestery

Promptly controls mixed G.I. infections due to Gram +ve, Gram -ve bacteria, Anaerobes and Giardia

**CONVENIENT BID DOSAGE**
3 to 5 years - 2.5 to 5 ml. BID for 7 days
Above 5 years - 5 ml. BID for 7 days

The Empirical Therapy for Diarrhoea and Dysentery

In FEVER MANAGEMENT

**Molid**
Nimesulide 50 mg. /5ml. Susp.

Superior to Paracetamol
Safer than Ibuprofen
Tasty Mango Flavour

Faster, Tastier, Convenient & Safer way to control fever
IN SEVERE P. FALCIPARUM MALARIA

Arty-αβ 1ml. 2ml.
α-β Arteether Injection

α-β Arteether
Is indicated for use in severe P.falciparum Malaria including Cerebral Malaria

α-β Arteether
Use as a second line treatment in Chloroquine resistant malaria

α-β Arteether
Is well tolerated, tenderness, swelling or discomfort have never been reported.

Arty-αβ
Right choice in P. falciparum malaria
